

## **COVID-19 Interim Safety Measures Policy**

During the COVID-19 pandemic, the Board and school administration will establish and enforce necessary precautions and mandates to protect the school community, based on developing conditions, and existing rules and health requirements and guidelines. At least monthly, the Board will review current conditions, rules and guidelines, and update this policy accordingly. The administration will communicate all updates to the school community, and post the policy, as updated, on the school website.

**Face Masks.** All persons present on campus and at school activities, including students, staff, visitors, volunteers, etc., must wear adequate face coverings as follows:

1. inside all school facilities, except when removal is necessary (e.g., to eat, for medication or medical needs);
2. when traveling on any school bus;
3. when participating in any other school activity, subject to other requirements established by the Board or administration

**ENFORCEMENT.** The administration will enforce these and all related safety requirements and shall apply all reasonable measures necessary. Any person not complying with such requirements may be asked to leave the school premises or activity, promptly. If the person is a student or staff person, that person may be subject to disciplinary action.
