

Enrichment Committee Meeting - 9/14/17

Franklin, Largent, Cauble, Swift, Purdee, Richards, Wyatt, Poole, Putnam

Committee Update:

Jeff Waldrop will be working the facilities

Charlene Crawford will be working with the governance

Welcoming Lisa Largent (parent) who is new to the committee

1. Distribution of minutes from last meeting

Motion: Putnam; Seconded: Poole

2. Information about the school report card - Jennifer Purdee

Diane Ward compiled data comparing PCCS to the state and Gaston County. Jennifer shared the history of PCCS test scores since opening. We are still rebuilding from the switch from NCSCOS to Common Core State Standards. Jennifer is very pleased that PCCS scores higher than the state average and GCS average of EOG scores and Grade Level Proficiency. Jennifer is hoping the average would be around 80%. Ed Report analyzes curriculums - CKLA just got added in Ed Reports and it is very well received. That is what we use in the elementary campus in grades K-3. We have plans in place to focus on grades that need to improve. We are 3rd in the county behind Gaston Early College and Highland on the English II EOC and Math I. Biology made a big leap this year and we hope to see the Biology scores increase.

Overall report card score is a 74 (B). This is the information that goes on the school report card. 80% of our GLP score. Growth score is 20%. **Our goal this current school year is to be 75% proficient; it is currently 70.7%.** As long as we make growth, our report card grade will be higher. We will still talk about proficiency when we talk about our goals. Other things added is our graduation grade - 88%. CCR goal is 60%, last year we were 59.2% (these are students who score 4s and 5s; the state considers these students to be college and career ready). ACT scores count in the report card. The goal is to get to 80 quickly. There is a plan in place to help boost ACT scores. This will be discussed at the next meeting.

We were below on the graduation rate because of students leaving PCCS and going to Gaston College (Adult High School). Last year the State Board of Education changed legislation, if students were enrolled in Gaston College (Adult High School) and they did not graduate and it counted against us. We have to prove they graduated. Four students did not graduate.

Growth status - we did meet growth - we grew 3 points between the 15-16 and 16-17 school year. Jennifer has a three year plan. Kathy B and Jess Miller will be working with reading and math (respectively).

AMO state - Annual Measurable Objectives - Federal Targets. We met 100% of our federal targets. This does not factor in the report card grade.

Math I score - advanced Math students in the 8th grade. Their scores are averaged in with Math I scores taken by the 9th graders. This year, 8th grade students in Math I will only take the EOC. The only scores that will count for the 8th grade Math scores are the students who are in 8th grade math. Jennifer hired a math remediation teacher who goes into remediation classes to work with math teachers. Also, a new curriculum was purchased to support the math curriculum.

Science Lab - more hands on experiences; lab would be built during the summer. This lab will give students more hands on experience and hopefully boost the Biology scores (which were up from the previous year).

Growth Numbers - EVAAS

EVAAS makes a predicted score based on three years of trend data per student.

Green- met growth:

Math: 4th grade, 6th grade, 8th grade

Reading: 3rd grade, 4th grade, 5th grade, 6th grade, 7th grade

EOC: English II, Biology

Blue - exceeded growth:

Math: 5th grade

Reading: 8th grade

EOC: Math I

Red - did not meet growth:

Math: 7th grade

NC Check Ins - State allowed us to opt in this year for the following grade levels:

Math - 4th, 5th, 6th

ELA - 5th, 6th, 7th

Math I gets averaged in with their high school GPA (in 8th grade)...charter schools only.
2020 - scoring changes to a 10 pt. scale. In order to maintain a B - we will need to be at 80%.

3. Finalize MAP data - Alex Poole

Alex sent an email to everyone along with a presentation. Does this make sense? Is it a valid number to present to the board. The board requested to simplify data to one number. It would be an average of RIT scores. NWEA and ACT testing are the most reliable tests out there. Mr. Satterfield would like information on this on Saturday. It will be presented to the board on Tuesday. Feedback to the board that strategies; positive/negative effects.

Update: SIT on Secondary Campus implemented the Patriot rewards program. Rewards based on performance. 52% of high school students will qualify for the first quarter reward...largest group who have qualified for this.
